

ALEXANDRU TACHE

JUNIOR WEB DEVELOPER

An accomplished Web Developer bringing both practical and academic experience in developing websites and web applications. Demonstrates a solid track record of utilising a range of technologies including HTML5, CSS3, BOOTSTRAP, JavaScript, Angular, jQuery, PHP, Node.js and MySQL. Skilled at understanding client requirements when developing bespoke websites.

WEB DEVELOPMENT EXPERIENCE

Web Application; Pic-Slash

- Gathered project requirements and ensured these were accepted and approved.
- Successfully built a web application with MEAN stack, using the Unsplash API.
- Utilised Unsplash photo engine, which has the largest open collection of high-quality photos as well as Node.js and Express to feed the front-end with search results queried by the user, with infinite scrolling.
- Built the front-end with Angular and Bootstrap to provide crop functionality for the pictures and easy download.

Web Site, Cloud

- Developed a stock management system with admin dashboard built using PHP and MySQL database.
- Provided log in functionality to allow admin to register and remove users. Enabled users to add items, change stock levels or update planned deliveries. It has been built using PHP and MySQL database.

CURRENT OVERVIEW

Yummzy, Manager, NOV 2018 – JAN 2020

- Provided supervision, leadership and motivation to staff to maintain performance and achieve set targets relating to customer satisfaction.
- Performed in a target-driven environment and ensured the achievement of targets.
- Ensured that the work/customer areas were to the required health and safety standards.
- Supported the recruitment, training and induction of staff.
- Management of stock ordering, merchandising, deliveries as well as cashing up.
- Remained calm and composed in highly pressurised customer situations by consistently displaying a polite and courteous demeanour.

Various roles, inc McDonald's, 2015 – 2018

- Prepared a range of orders and accurately handed customer cash/card payments.
- Maintained cleanliness, accessibility and appearance of stock areas to minimise hazards to people and stock.
